SchoolTech's expert Technologists and Trainers want to join your team!

STS Technologists help schools overcome barriers to success:

- Navigate and manage the barrage of technical challenges that come with online testing platforms
- Create a fast track to e-Rate funding
- Develop and administer your Google Suite or Office365 collaboration and management platforms
- Support for Student Information System optimization, customization and integration
- Deploy interactive classroom technology to capture learning and create reusable assets
- Manage and improve your outward facing online and social presence to build stronger community and drive enrollment
- Network systems administration, server virtualization, desktop support on all platforms

In addition to making your school or district run smoothly from a technical perspective, STS provides training and professional development to support staff to be at their best in the classroom and the administrative office.

Our Trainers will support and inspire your staff:

- Certified Google Suite and Google Classroom Trainers can assist staff to re-envision their classroom operations by integrating age-appropriate technology tools and practices
- Tried and true pedagogical models for applying technology in the classroom for improved student engagement and learning outcomes
- Techniques for capturing classroom learning and creating reusable digital assets
- Working with you to develop and administer your Student Information System and Google Apps for Education or Office 365 management platform
